

pokerpower™

LESSON 1: COURAGEOUS

Learn basic poker strategy paired with stepping outside your comfort zone. It takes courage to show up. It takes more courage to take action. By learning to bet and raise, we push ourselves to outside of our comfort zone. Our actions serve as our voice. By putting pressure on, we practice maximizing our advantage and capitalizing on opponents' poor decisions all while minimizing risk.

LESSON 2: BOLD

Aggression and position matter! Set imposter syndrome aside and learn to take calculated risks. By using the effective combination of aggression and table position you will learn the right time AND the right moves to make. Practicing being bold will help you become a better poker player and negotiator in all scenarios so you can maximize your success.

LESSON 3: DETERMINED

This lesson is all about how to get what you want. We practice making difficult decisions under conditions of uncertainty and time constraints. By analyzing all the information, and eliminating biases we come to a logical next move and avoid decision-making traps.

LESSON 4: PERCEPTION

Build on your poker skills by reading your opponent and focusing on emotional control. By analyzing our opponents' actions and patterns, we can better understand their motivations. We're looking for signs of weakness, but we also need to recognize signs of strength. Equally as important is our own self-awareness and emotional control.

LESSON 5: DISCIPLINE

Becoming successful in life is a marathon, not a sprint. In poker, you can practice and fail, and try again and again until you win. We help you take that desire and determination and turn it into success with repetition and practice.

LESSON 6: AMBITIOUS

Are you playing to win, or are you playing to not lose? Instead of holding back and playing scared, we teach you specific strategies to help you work your way to the top. Know what you want and go for it.
